### **Pomegranate Phones will release a new IOS Software on March 15 at 1 p.m. EST**

MARIETTA, Ga. (March 2, 2021)- Pomegranate Phones will release a new IOS software update for the company's phones on March 15, 2021 at 1 p.m. EST. This comes in response to the company slowing down phones due to a degradation of their lithium ion batteries.

Pomegranate Phones will host an event at the company's headquarters in Marietta, Georgia, for the software update, as it is the beginning of a new phase of Pomegranate Phones. The event will be streamed live on the company's website [www.pomegranatephones.com](http://www.pomegranatephones.com).

Pamela Hobbs, CEO of Pomegranate Phones stated, "We as a company want to ensure that we are as transparent and honest as possible in the future. We plan to start a new era here at Pomegranate Phones with the introduction of this new software update."

This event will include an in depth reveal of the purpose and performance of the new update and introduce Pomegranate Phones' future plans. The software update will be available for all Pom Phones 6th generation and older.

The software update will contain a fix to all glitches, an app dedicated to measuring battery health, a news app dedicated to the goings-on of the company with regular updates, a new camera filter, a new fingerprint scanner, background photo options and a new adaptability to different internet browsers including Firefox.

"We are very excited to reveal our new software update. We hope that these new additional features will ensure that our customers' phones are being able to reach their full potential," said Carl Frankfurt, Senior Vice President of Software Engineering.

The next phase of Pomegranate Phones will begin with this update with new technology ahead. Visit [www.pomegranatephones.com](http://www.pomegranatephones.com) for more information regarding the event and the new software update.
